## WHAT IS AN OUTDOOR KITCHEN

An outdoor kitchen can be referred to by several names; BBQ island, summer kitchen, grill station, or BBQ kitchen. Regardless, an outdoor kitchen is similar to an indoor kitchen in that they both have a built-in cabinet or enclosure, countertop space, cooking, and other appliances. The purpose of an outdoor kitchen is to create some level of autonomy and functionality to prep, cook, serve, and entertain outside. In addition, there is a high aesthetic and design value to an outdoor kitchen that can transform your outdoor living space. Like inside the home, the outdoor kitchen is the “heart” of the outdoor room where people gather, converse, and hang out.
